

Transcriptome-physiology integration (§5.7) and membrane remodelling (§5.4)

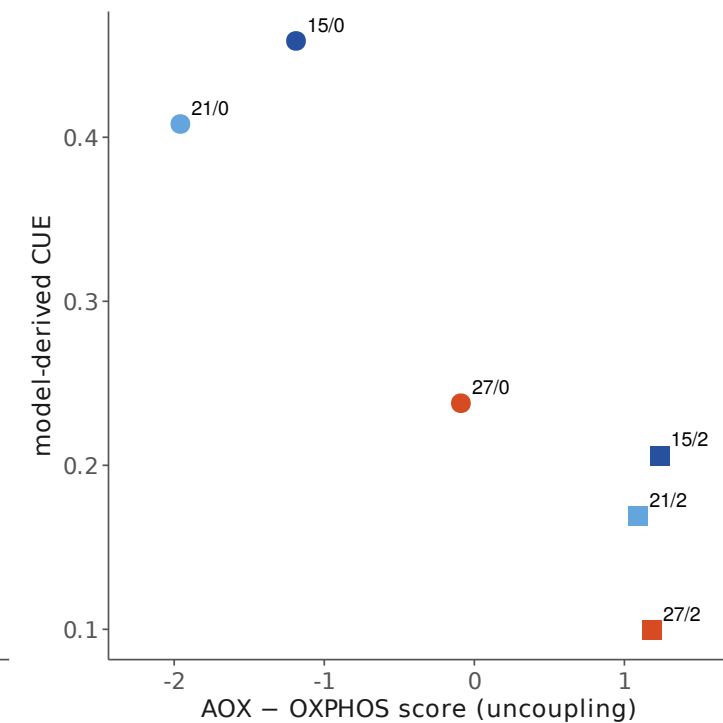

A Growth vs ribosome ($r=0.93$, $p=0.007$)

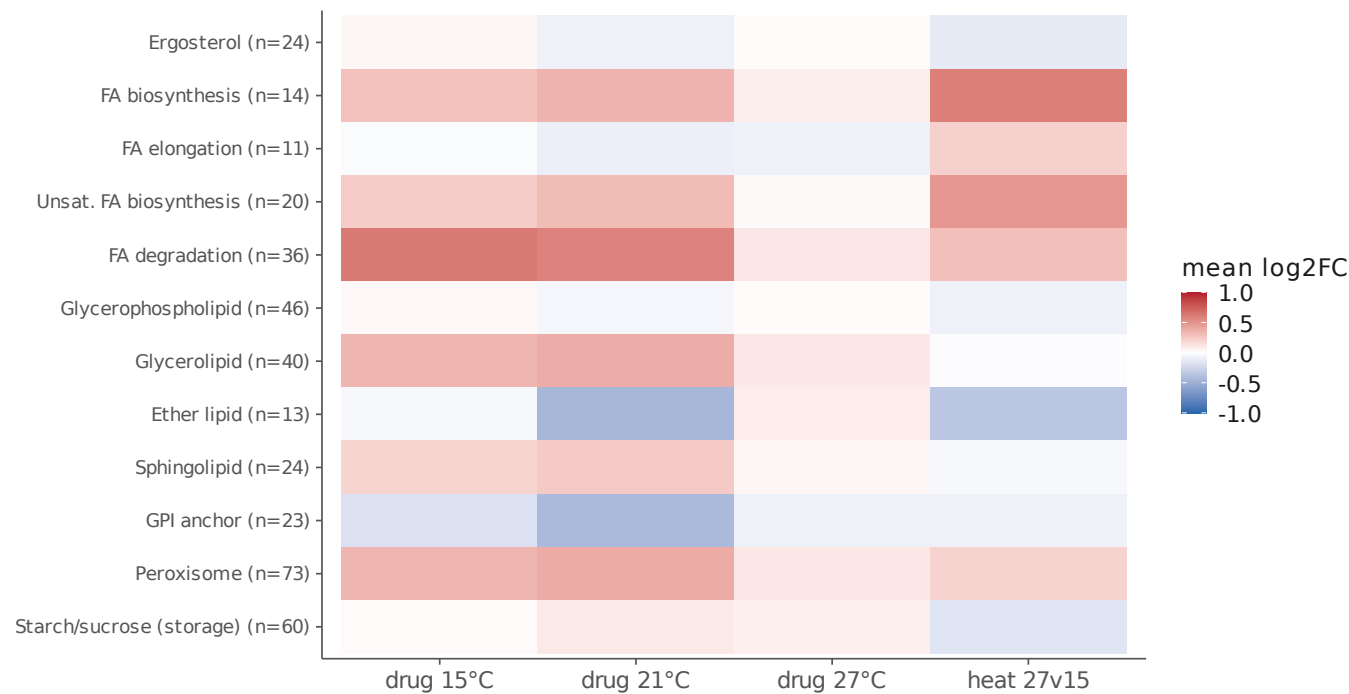

B Respiration vs AOX ($r=0.71$, $p=0.111$)

C CUE vs uncoupling ($r=-0.92$, $p=0.010$)

D Membrane / storage remodelling (mean shrunken log2FC)

E What does 27 °C control resemble?
