

# Transcriptome-physiology integration (§5.7) and membrane remodelling (§5.4)

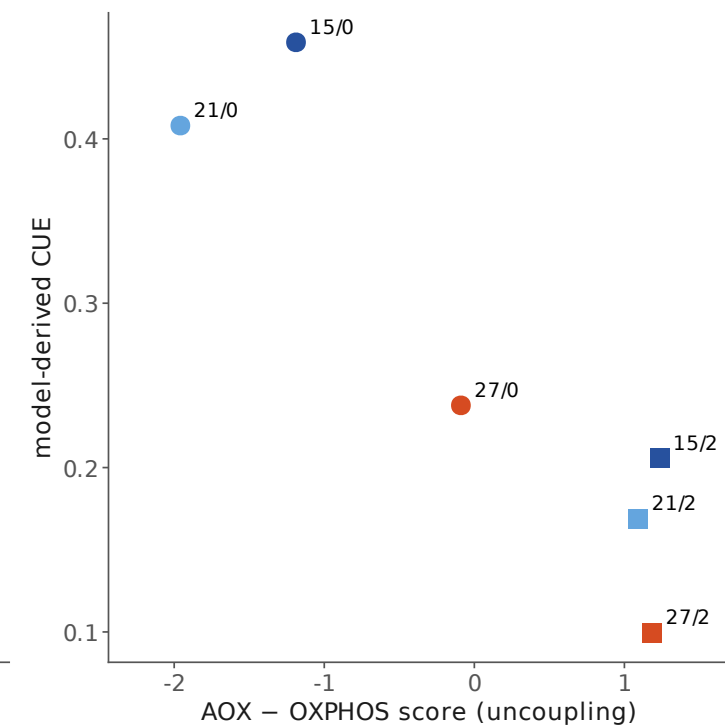

**A** Growth vs ribosome ( $r=0.93$ ,  $p=0.007$ )

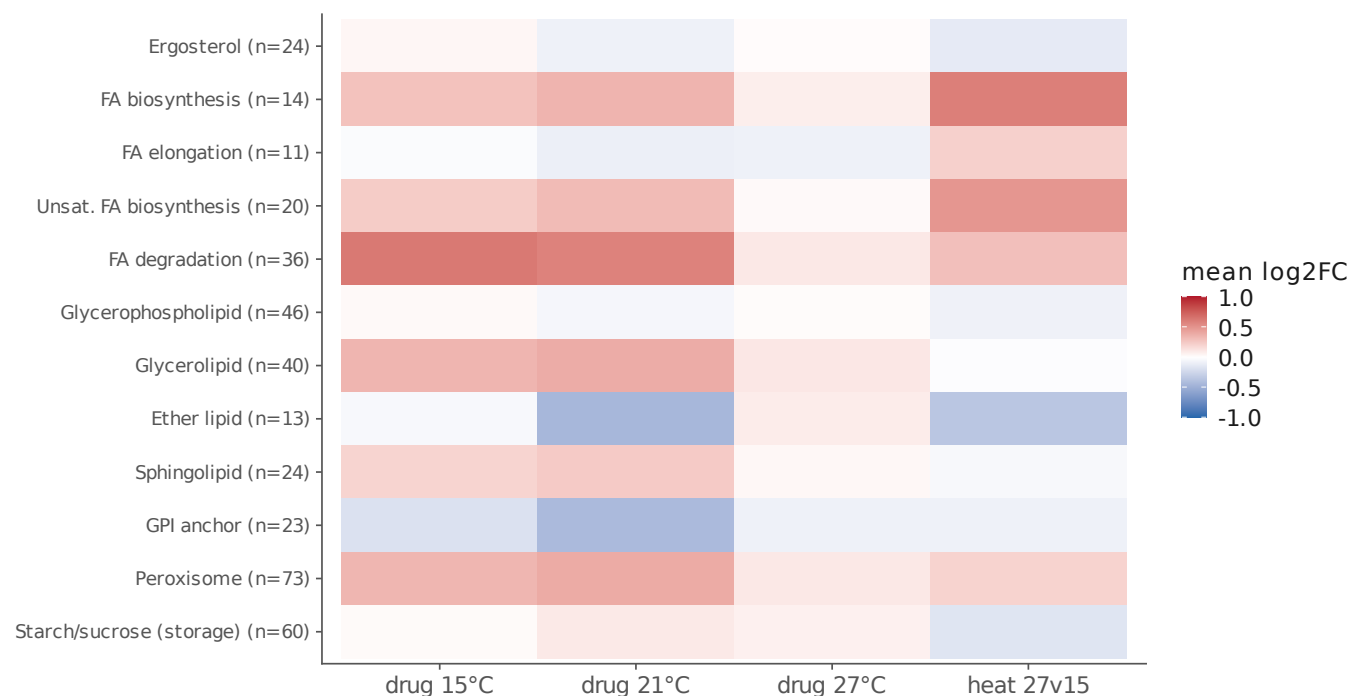

**B** Respiration vs AOX ( $r=0.71$ ,  $p=0.111$ )

**C** CUE vs uncoupling ( $r=-0.92$ ,  $p=0.010$ )

**D** Membrane / storage remodelling (mean shrunken log2FC)

**E** What does 27 °C control resemble?
